

Aims & Objectives

To foster social cohesion amongst the scattered African persons or groups in Norfolk and thus mitigate any feelings or effects in isolation, social exclusion or racial abuse.

To provide a forum for association, consultation and mutual support particularly for members who are unemployed.

To promote personal development for self-reliance through activities that impart the appropriate knowledge and skills such as organic gardening, conservation science and other vocations that foster self-employment. To sustain the African heritage through some social activities within the context of life in Britain, in collaboration with organisations with similar or complimentary aims.

FOSTERING SOCIAL COHESION IN NORFOLK

About NACA

Norfolk African Community Association, NACA, is a voluntary organisation, one more component of multiethnic and multicultural society in Britain at large and Norfolk in particular. It was founded by some members of the African community in Norwich out of their own experiences of life in the eastern county during the years who espouse the need to promote and sustain the African heritage among its members in Norfolk. NACA supports the campaign for sustainable development and protection of the environment as well as advocacy of social justice and individual liberties.
